CAD Program

Twinmotion
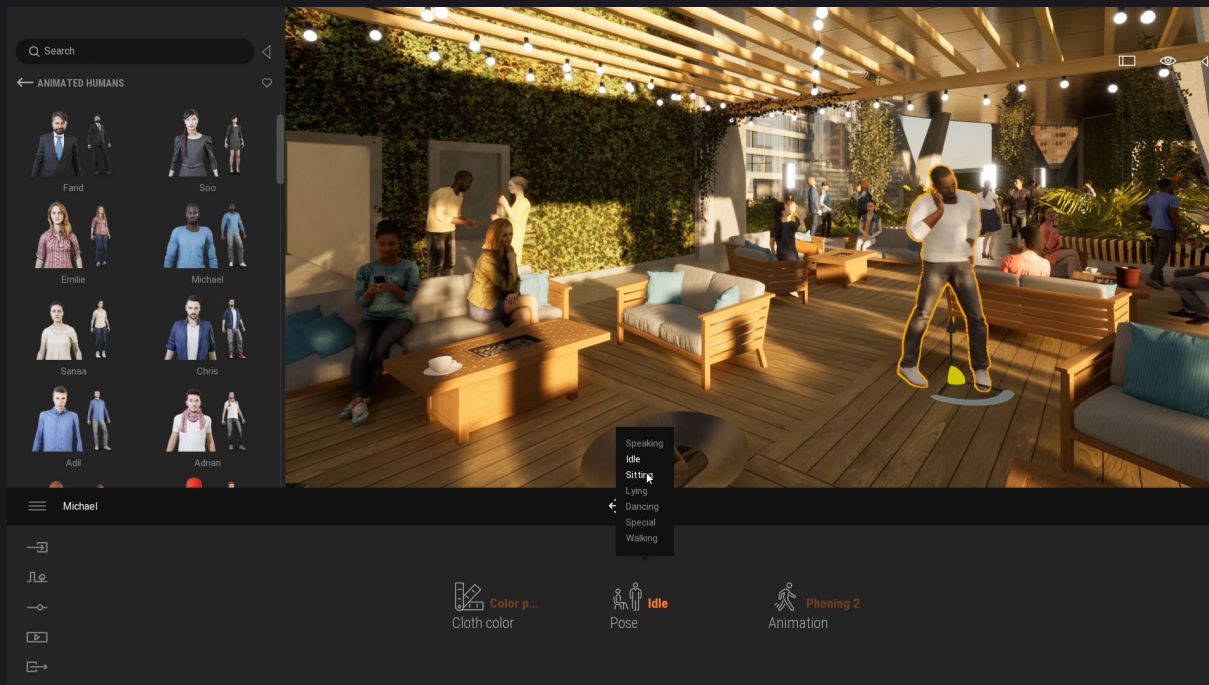

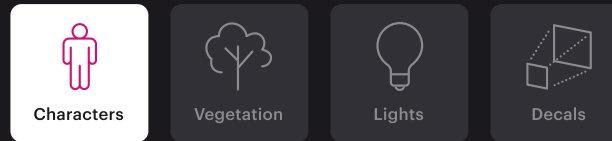

Works with your favorite software

With direct one-click sync with Archicad, BricsCAD, Revit, SketchUp Pro, Rhino, RIKCAD, and Vectorworks—plus support for many other packages—getting your data into Twinmotion and then continuing to update it is a breeze.

## Over 10,000 ready-to-use 3D assets, materials and sounds

Twinmotion's constantly expanding library includes Smart Assets like trees that grow, doors that automatically open, and pedestrians and vehicles that will follow a path you define. Plus, get direct access to Quixel Megascans, the world's largest library of 3D scans.

Seasons

Weather

Growth
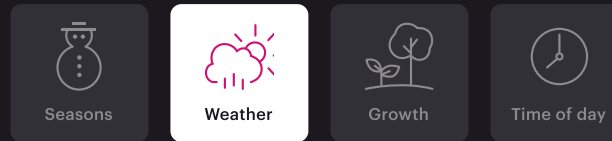

Time of day

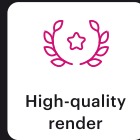

Easy, quick, and fun to learn and use!

With Twinmotion's incredibly intuitive UI, you'll be up to speed in no time. Changing the season, weather, or time of day is as easy as dragging a slider. And with physically-based materials, and built-in effects like depth of field and lens flare, getting the look you need is simple.
